(Name) is a (white/Pakistani) (man/woman). Up until a year ago, life was pretty okay for (Name). But then, things started to change. (He/She) thought that people around (him/her) were making disapproving comments, and talking behind (his/her) back. (Name) was convinced that people were spying on (him/her) and that they could hear what (he/she) was thinking. (Name) lost (his/her) drive to participate in (his/her) usual work and family activities and retreated to (his/her) home, eventually spending most of (his/her) time on (his/her)own. (Name) became so preoccupied with what (he/she) was thinking that (he/she) skipped meals and stopped washing regularly. At night, when everyone else was sleeping, (he/she) was walking back and forth at home. (Name) was hearing voices even though no one else was around. These voices told (him/her) what to do and what to think. (He/She) has been living this way for six months.

(Name) used to enjoy playing (football/tennis) but recently gave it up because of these problems. (Name) feels badly about (his/her) breathing problems, which seem to be getting worse, and wishes (he/she) could 'be just like everyone else.'
